ZULVI SUMARNA

Web Developer

■: julvism4@gmail.com
Gender: Male

9: Jln soekarno hatta, Kota bandung, Jawa barat. **Marital Status**: Single

I have extensive skills in website development, including frontend and backend programming, responsive design, and database integration. This allows it to create attractive and well-functioning websites. With experience accumulated from various projects, I have faced various challenges and gained a deep understanding of best practices in website development. evolved in solving complex problems in website development, be it regarding performance, security or functionality. I am always committed to delivering high quality results to clients and end users. This is reflected in every aspect of the website development I undertake as well as being able to communicate well with clients and team members, ensuring a clear understanding of project requirements and communicating progress effectively.
